## ACCOUNTABILITY STATUS IN THE HEALTH SECTOR IN BOTSWANA

| ACCOUNTABILITY<br>ACTOR   | DOMINANT<br>ROLE  | ACCOUNTABILITY<br>STATUS   | RECOMMENDATIONS   |
|---|---|--|---|
| Policymakers such as members of parliament at the national level, and department heads within the MOH | <ul> <li>Set the development agenda and formulate policies</li> <li>Allocate resources to programmes</li> <li>Evaluate policies in order to assess their relevance</li> </ul>                                       | <ul> <li>Parliament allocate budget to the health sector and has a Public Accounts Committee that scrutinises public spending.</li> <li>Ministry of Finance and Economic Development (MFED) has seconded officers to Ministry of Health and Wellness for compliance with planning and budgeting regulations.</li> <li>MFED hosts consultative forums to establish national development planning priorities.</li> <li>National AIDS &amp; Health Promotion Agency hosts annual workshops to identify programming priorities and gaps and direct resource allocation.</li> </ul> | <ul> <li>Improve policy evaluation in order to strengthen parliamentary accountability structures</li> <li>Tighten engagement between MFED and line ministries especially at programme level needs to ensure coordinated health programs evaluations</li> </ul> |
| Public sector health service providers and health managers  | <ul> <li>Design programmes and projects to<br/>achieve policy objectives</li> <li>Engage communities to promote uptake of<br/>health services, monitor use, and propose<br/>financial resources required</li> </ul> | <ul> <li>Botswana has health districts headed by the<br/>District Health Management Teams<br/>(DHMT), under which falls several health<br/>services facilities with clear reporting lines.<br/>However, there is a reporting gap between<br/>programmes and the DHMT due to a<br/>centralized M&amp;E system.</li> </ul>   | Decentralize the M&E within Ministry of<br>Health and Wellness  |
| Community representative  | Engage policymakers to ensure their needs are prioritized   | <ul> <li>Village Health Committee are an extension<br/>of the health system especially in promoting<br/>good health practices, finding and<br/>registering home based care patients.</li> </ul>  | <ul> <li>Improve capacity building to strengthen<br/>the skills base of VHC members</li> </ul>  |
| Civil Society Organizations   | <ul> <li>Extend government services to the community, beyond health facilities</li> <li>Identify service gaps and engage government to plug those gaps</li> </ul>   | <ul> <li>CSOs are involved mainly in health service provision, community mobilization, and advocacy.</li> <li>They mostly depend on donor and government funding for their operations.</li> </ul>  | <ul> <li>Strengthen resource mobilization efforts<br/>and expand revenue streams to minimise<br/>reliance on donor and/or government<br/>funding</li> </ul>   |
| Media   | <ul> <li>Provide a platform for government /policy<br/>makers to "meet" the community, in a<br/>virtual sense.</li> </ul>   | <ul> <li>Although media practitioners have been<br/>sensitized on health strategies and priorities<br/>impact is not evident. Media also faces a<br/>challenge accessing information.</li> </ul>   | <ul> <li>Enact Freedom of Information law to<br/>increase the answerability of governments<br/>through the creation of space for public<br/>authorities to render account</li> </ul>  |
